# Jhon Jardim

Fullstack Developer

ABOUT ME

I'm Jhon, and these days, I proudly identify as a **Software Engineer**. However, I see myself as much more than that. I'm a driven, diligent, and highly **autonomous** individual – unafraid of tackling challenges, even when they push the boundaries of my knowledge. I thrive in collaborative environments, often serving as a catalyst for collective progress. I love working in teams where I feel like I learn something new every day, teams where we all push each other towards progress.

But I also have some knowledge about:

- Python / PHP / C / C# / Lua

Other interesting and useful technologies/skills:

- Agile, JIRA / Web services / SEO Optimization / Web APIs / Serverless development / Unix operating systems

ACADEMIC BACKGROUND

COMPUTER SCIENCE COURSE
42 Lisbon | 2021

- 42 is one of the best programming schools in the world, with more than 10,000 students in over 20 countries. It is a school that encourages peer to peer learning, as well as pushing each of their students to be better everyday. The students develop increasingly demanding projects that require gigantic autonomy and responsibility.

LANGUAGES, LITERATURES AND CULTURES
University of Lisbon | 2019 - 2021

- The course aims at the acquisition of advanced competence in one or more European languages, knowledge in the respective cultural areas and skills for professional activity in a multilingual and multicultural environment.
